Thank you for purchasing The Content Mastery Tracking System!

Rather than installing the software on a computer in the lab, all that is required is ANY computer that is connected to the internet (using Microsoft Internet Explorer 6 or higher) and Adobe Acrobat Reader (for viewing reports). We've set your lab(s) up in the system and provided at least one lab manager login and at least one admin level user login.

System Requirements:

Although the software is web-based, here are a few things that are required:

- PC (Windows) computer
- Connected to the internet
- Using Internet Explorer 6 or higher for the browser
- Adobe Acrobat Reader (which is a free program readily available for downloading)
- Popup blocking software must be disabled
- Don't have any other web pages (browser windows) open

There are two "programs" that make up the CMTS Software, but instead of being two actual programs that are installed and run on a computer, they exist as two different web sites.) The CMTS Admin program is used for managing students, subjects, running reports, etc while the CMTS Logo program is specifically for use by the students to log in and out of the lab.

To start the **CMTS Admin** program, connect to the internet (using IE 6 or higher) and go to this web address: <http://www.sourceprosoftware.com/cmtsadmin> (Please note that you don't have to use admin level credentials to use the CMTS Admin program).

To start the **CMTS Logon** program, connect to the internet (using IE 6 or higher) and go to this web address: <http://www.sourceprosoftware.com/cmtsweb/cmtslogon.aspx>

Remember, you can do this from separate computers or from the same one, its up to you. If you prefer, you can start up the CMTS Logon on multiple computers in the lab (and let students sign in and out on any of them) while running the CMTS Admin program from your computer at your desk. You'll want to bookmark these web addresses for easy reference later.

For complete documentation, please see our detailed online help file:

<http://www.sourceprosoftware.com/cmtsadmin/help/index.htm>

SourcePro Software is always looking for ways to provide the best support in the industry. We highly recommend that you use our support portal:

<http://portal.sourceprosoftware.com>

The portal allows users to access a wealth of knowledgebase articles, live chat support (not always available), and submit help tickets (requires registration).

We're confident that you'll be pleased with the Content Mastery Tracking System and look forward to working with you!

Thanks again, and please let us know if there's anything we can do to help!

The SourcePro Software Team
